

YOUR KIOSK PARTNER

POWER) PRODUCTS

Self-service Terminals

Company Profile

POWER products s.r.o. was founded in 1996 in Prague, Czech Republic, with the amalgamation of Graphic Products s.r.o. and Business Power Systems s.r.o. The company now has over 17 years experience in selling, servicing and the production of specialized IT equipment.

Today POWER products has become a leading supplier of kiosks, self-service terminals, special monitors, LCD panels, touchscreens and industrial and military monitors.

We design and manufacture a full range of modern stylish kiosks which, complemented by a comprehensive selection of accessories, offer an attractive and cost effective solution for a wide variety of business and information applications. Being very flexible we are successful in the design and manufacture of customer's unique kiosk requirements.

Our actual kiosk production capacity exceeds 4.000 units now.

We also specialize in the integration of LCD touch-screens and the distribution of a wide range of associated products including touchscreen sensors and controllers, kiosk and OEM printers and keyboards, watch-dogs, coin selectors, bank note acceptors and card and barcode readers etc.

Our staff is present to serve you.

Purpose built monitors for harsh environment applications (special mechanical, climatic, and electronic conditions i.e. applications of a military and industrial nature) are another speciality of ours.

The company's sales turnover continues to grow dynamically and now exceeds Euro 7.5 million. We have a highly qualified and motivated work force of almost 40 employees, whose objective is to satisfy the most exacting requirements of our customers.

Since 2002 we have been ISO 9001:2001 QMS certified for Sales Systems, Production, IT Service, Electronics and Electrical Engineering.

POWER products s.r.o. is a progressive company with growing international sales, fully supported through either our own local offices and representatives, or carefully chosen specialist distributors in more than 30 countries covering Europe, the Middle East and Africa.

The Eagle is our most versatile kiosk suitable for indoor applications and comes in many variations. It combines an attractive design with the highest possible construction quality. Description of the Eagle Standard is as follows:

- Dimensions: 1550(H) x 500(W) x 430(D)mm.
- Aluminium construction with metal and plastic components
- Secure wiring
- Wide Colour Choice
- Flexible solution for additional peripherals

Standard Specifications:

- 17" LCD with touch screen
- Metal Keyboard with Trackball
- Dell 760 SF Custom Configuration,
- 3 Years Warranty Next Business Day
- Active speakers

Eagle Standard

Optional peripherals:

- 15" and 19" LCD with touchscreen • 15", 17" and 19" LCD with secure glass protection
- Vandalproof sensor • Antireflex glass
- Thermal printers 60 - 210mm • Webcam
- Telephone handset • Card reader (chip, magnetic, noncontact)
- Barcode reader • Internet Browser POWER)BROWSER
- Special colour and graphics • WiFi
- Other peripherals on request.

Electrical installation:

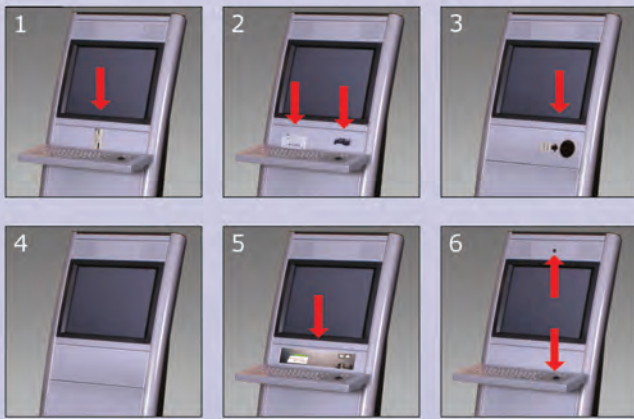

Fully secured wiring is installed for maximum user safety and kiosk hardware protection. The kiosk received CE certification. Wiring includes: • Current protection with integrated 16A Circuit Breaker • High voltage protection

The Eagle is available in many different colours and hardware configurations. The space on the front is very convenient for printing your company logo or customised artwork.

Here are some examples of various applications of the Eagle Standard and Eagle Wall models.

1. Eagle with Coin Acceptor
2. Eagle with 112mm Thermal Printer and Hybrid Card Reader
3. Eagle with Barcode Reader
4. Eagle with Touchscreen, without Keyboard
5. Eagle with 80mm Thermal Printer, Hybrid Card and Barcode Reader
6. Eagle with Camera and Keyboard with Trackball

Marketing & Advertising kiosk solution, most suitable for Retail and Promotional Applications

Eagle Wall

This wall-mounted version of the Eagle retains all the advantages of the standard model whilst the variable mounting height enables access by wheelchair users and children.

- Dimensions: 845(H) x 500(W) x 380(D)mm
- Aluminium construction with metal and plastic components
- Wide Colour Choice • Multipoint Safetylock

Standard Specifications, Optional Peripherals and Electrical Installation are similar to Eagle Standard.

Eagle Shift

Specially for wheelchair users, smaller and longer people we developed this Eagle with shifting possibility. With an easy touch on a button they can now manouvre the screen in the most comfortable position, silently and within seconds. The difference between the highest and lowest position is 50cm.

Standard Specifications, Optional Peripherals and Electrical Installation are similar to Eagle Standard.

This Eagle version benefits from the addition of a secure multi-lock mechanism and a larger, deeper back cover. These enhancements make it suitable for payment applications or the integration of large peripherals. It is secure enough to leave unattended.

- Dimensions: 1550(H) x 500(W) x 405-540 (D) mm.
- Aluminium construction with metal and plastic components
- Secure wiring • Wide Colour Choice
- Customised Graphics option
- Flexible solution for additional peripherals

Optional peripherals:

- 17" or 19" with or without touchscreen
 - Extra advertising display 19", 19" wide or 32" and up • Metal keyboard with trackball
 - Coin selector • Note acceptor • Card readers
 - Pinpad • Printers • UPS • Dispenser
 - Hopper • Camera • Telephone handset
- Other peripherals on request.

Electrical installation:

Fully secured wiring is installed for maximum user safety and kiosk hardware protection.

The kiosk received CE certification.

Wiring includes:

- Current protection with integrated 16A Circuit Breaker • High voltage protection

Eagle Magnum

The Eagle Magnum is available in different body shapes, all depending on the application.

The examples shown below are produced kiosks. The variation possibility is sheer endless depending on the desired application.

Eagle Jumbo

This wider version of the Eagle is designed to house a colour or high capacity B/W laser printer. A wide selection of other kiosk peripherals can also be fitted.

- Dimensions: 1550(H) x 540(W) x 564 (D) mm.
- Aluminium construction with metal and plastic components
- Secure wiring
- Wide Colour Choice • Customised Graphics option • Flexible solution for additional peripherals

Standard Specifications:

- 17" LCD with touch screen
- Metal Keyboard with Trackball
- Dell 760 SF Custom Configuration, 3 Years Warranty Next Business Day
- Active speakers

Other peripherals on request.

Electrical installation:

Fully secured wiring is installed for maximum user safety and kiosk hardware protection. The kiosk received CE certification. Wiring includes:

- Current protection with integrated 16A Circuit Breaker
- High voltage protection

Eagle Custom

Thanks to the very flexible design the Eagle is an ideal kiosk to implement your special requirements. As you can see below it can house almost any application you might think of.

Photo Eagle

Able to load pictures from any memory card, CD/DVD or via bluetooth and infra-red. Payment by coins, banknotes or loyalty cards. High quality photoprinter for immediate printouts.

Flight Ticket Eagle

Provided with: (from top to bottom)

- 17" LCD with touch screen
- Card Reader
- Pinpad
- Receipt Printer
- Flightticket printer

Strong build quality makes the Hawk the ideal kiosk for most outdoor applications. Suitable for public information systems - tourist and city information systems for example.

- Dimensions: 1820(H) x 570(W) x 210(D)mm
- Full metal construction • Wide Colour Choice

Standard Specifications:

- 17" LCD with vandal-proof touch screen
- Dell 760 SF Custom Configuration,
- 3 Years Warranty Next Business Day
- Active speakers • Equipped for outdoor use

Optional peripherals:

- 15" and 19" LCD with touchscreen • 15", 17" and 19" LCD with secure glass protection • High Bright LCD • Keyboard • Trackball • Thermal Printers 60 - 112mm • Webcam • Telephone Handset • Card Readers (chip, magnetic, noncontact) • Barcode Reader • Special colour and graphics • Metal roof with toplight • Stainless steel pedestal • Remote control unit • WiFi

Hawk

Hawk with stainless steel pedestal

Outdoor equipment:

Zinc coated chassis. Special RAL outdoor paint. Multipoint safetylock. Full thermal insulation. Secure wiring is installed for maximum user safety and kiosk hardware protection. Temperature and humidity inside the kiosk is controlled by thermostat and hygrostat sensors. Wiring includes:

- Current protection
- High voltage protection
- Two circuit breakers
- Thermostat and Hygrostat
- Ventilation and Heater

The Hawk also offers an excellent space to display your promotional messages. It comes in many colours, according to the RAL Colour Scheme.

Application examples

Hawk Wall

Wall-mounted version of the successful Hawk

- Dimensions: 1200(H) x 570(W) x 210(D)mm
- Full metal construction • Wide Colour Choice

- Current protection
- Over-voltage protection
- Circuit breaker
- Fans

Budgie

The Desktop Budgie Kiosk is suitable for most POS and entertainment applications in restaurants, cafes and bars.

It can be used as a cash register, jukebox or gaming machine. In the photo industry it can be used to select your photographs and have them printed in the lab.

- Dimensions: 390(H) x 425(W) x 430(D) mm • Welded metal construction using 2mm thick steel
- Wide Colour Choice

Standard Specifications:

- 17" LCD with touch screen
- Dell 760 SF Custom Configuration,
- 3 Years Warranty Next Business Day

Optional peripherals:

- 15" LCD with touchscreen
 - Vandal-proof Sensor
 - Thermal Printers 60mm
 - Webcam
 - Telephone Handset
 - Card Reader (chip, magnetic, noncontact)
 - Barcode Reader
 - Memory Card Reader and CD/DVD Drive
 - Special colour and graphics
 - WiFi
- Other peripherals on request.

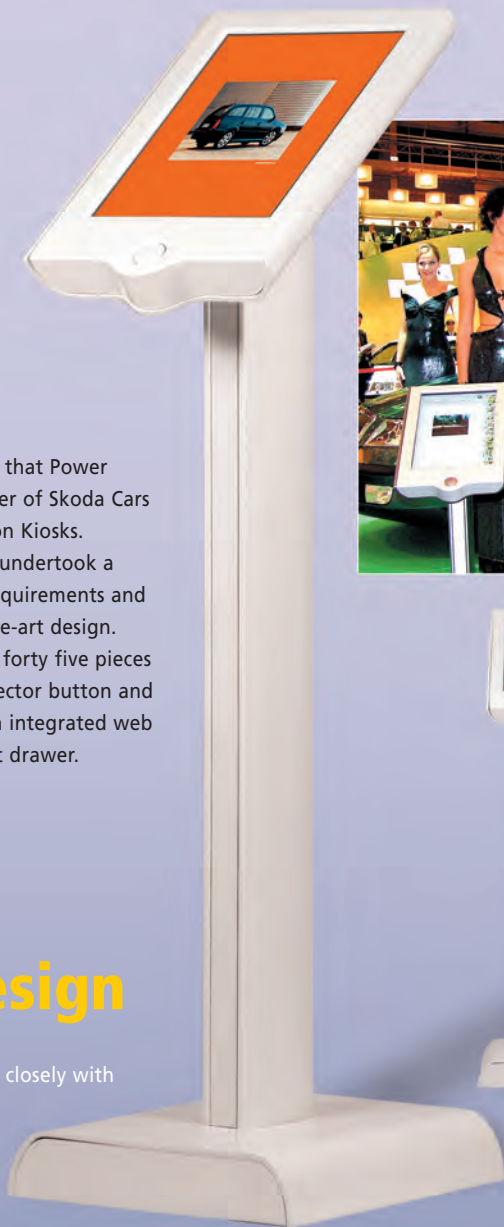

Skoda Auto Kiosk

We are very proud to announce that Power Products were the chosen partner of Skoda Cars for their new 2004 POI Exhibition Kiosks. Working closely with Skoda we undertook a complete study of their exact requirements and produced a stunning state-of-the-art design. We subsequently manufactured forty five pieces of 15" kiosks with language selector button and fifteen pieces of 17" kiosks with integrated web camera and notebook basement drawer.

Custom Design

Being very flexible and working closely with our clients we can design and produce custom kiosks to meet the very special requirements of our customers. On these two pages you can see some examples of these unique kiosks which can even be manufactured in small quantities. You can tell your clients that all things are possible with Power Products Kiosks.

Music Box

This unique custom designed kiosk was developed at the request of a customer to promote his products in bars, pub lobbies, clubs and restaurants. Video and audio multimedia and advertisement files are controlled by attractive user friendly 'touch' Jukebox software.

EVA - Electronic, Friendly Administration

The Eva Kiosk enables the general public to have remote access to local government information whilst also completing and submitting certain documents such as new ID and other official forms via simple, user friendly programs.

Mark-4

This unique custom designed kiosk was manufactured for our client yq? International, Ireland. It includes:

- 15" touchscreen LCD • Banknote Reader • Coin Selector
- Thermal Printer • UPS • GPRS Modem

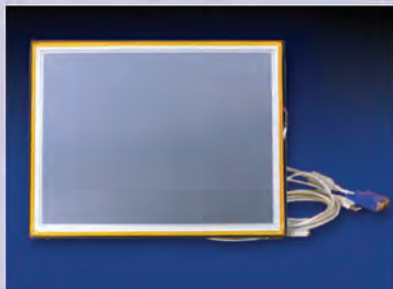

3M DST Touch Technology implementation

Power products has been selected the unique partner in middle Europe to implement the 3M DST touch technology into 32", 40", 42" and 46" large LCD's or plasma displays. This technology delivers fast, accurate and reliable touch response and is unaffected by screen surface contamination. It ignores static objects on the screen and allows for multi-user touch capabilities. It's ideal to use as interactive signage, public way finders, retail product selectors, point-of-information stations as well as in conference rooms and education presentation systems.

MicroTouch™
3M

LCD Displays

15" LCD TFT chassis.
Resolution: 1024 x 768.
